Portal dedicated to operators

Works with Bluetooth

Multi-area and multi-profile management

PRO.UP

The app for your work, simply with your devices.

Pro.Up is a practical and innovative tool for online management of the Saeco coffee machines that use the Pro.Up application.

Thanks to the dedicated portal, the operator will be able to manage and monitor an unlimited series of coffee machines connected in multiple areas, for multi-profile management (operator, technician, user). From the intuitive web interface, the operator can control his network and manage credits, alarms, statistics.
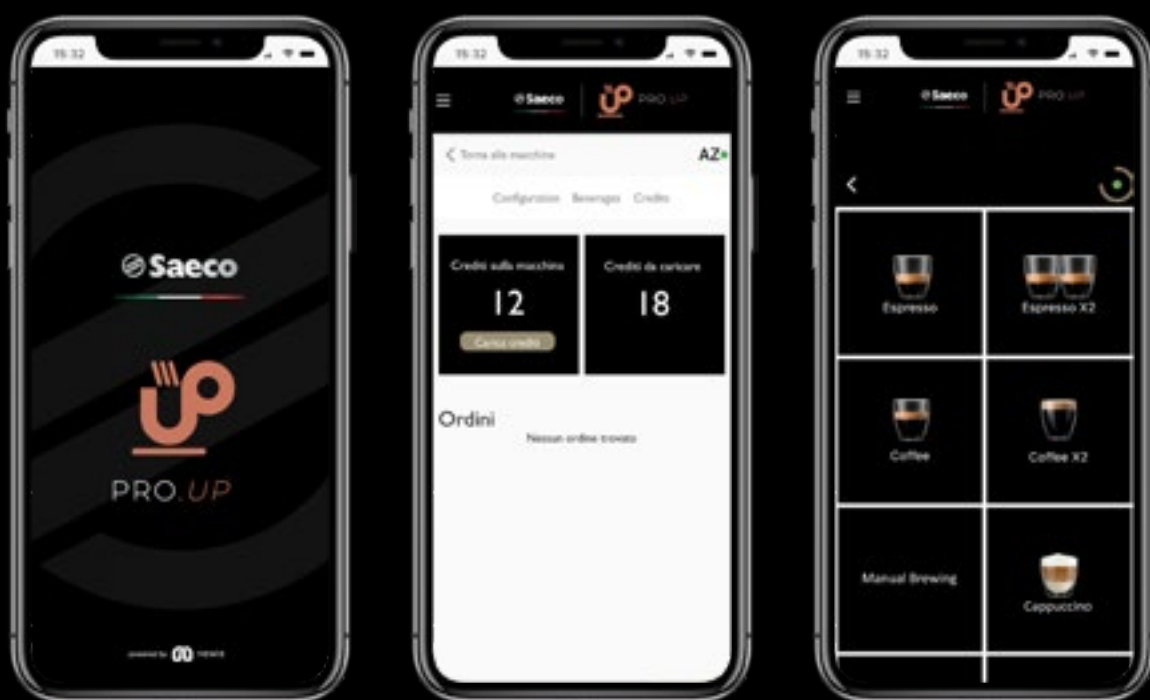

Pro.Up can be used with smartphones by both technicians, to easily activate and configure the coffee machine remotely, and by the user with in-app selection.

PRO.*UP*

PRO.UP

Innovative, secure and easy to use.

Thanks to the app, which can be downloaded for free from App Store® and Google Play®, or from the QR code on the coffee machine, the user can manage credit requests and the dispensing of beverages from the machine directly from his smartphone, in a simple and intuitive way, for a fully touchless experience thanks to the Bluetooth connection.
